The use of social media is replacing face to interaction among many people in society Discuss advantages and disadvantages Do you think advantages outweigh the disadvantages?

Nowadays social media is degrading physical interaction between people among the society. but it also has certain advantages too. This essay is all about the merits and demerits of social media that overcome the direct conversation between people However advantages outweigh the disadvantages.

Eventhough the social media is decline the interaction between people. It also has Two main advantages: connecting to people without face to face interaction and Introverts are able to connect with the world. Firstly, social media plays a vital role in connecting people who are far away. For Example, one can connect to others by using social media like Whatsapp, Instagram and Facebook. In the ways of chatting or video calling this is the foremost boon to the society. Secondly, Introvert people are getting better exposure to the world. In addition to the exposure they able to speak up.

openly without any hesitations. usually Introverts are Passive, Reserved and Shy. For them this Social media is a gift to open up their views and ideas. Exposing talents on Social media gave them some Satisfaction and inner peace.

On the hand, utilize Social media having demerits too. Firstly, It reduces the conversation inside the family. For Instance, All age group people are using Social Applications. Some of them don't spend time with their own family. As a result, The more number of people got addicted to some social media applications. The addiction to social media makes them to separate from their family numbers. These 'addicted people don't like to spend their time with family members. Secondly, In some cases an individual lose his Self confidence because of Social media For Example; when people keep on practicing without having a face to face interaction or conversation Then, it leads a way to degrades One's Self confidence and courage to have a conversation directly.

To conclude, Eventhough social media degrades physical interaction between people and also having some negative imparts on human beings. It has an drastic positive influence among society by connecting people around the world through audio chat, video chat and Texting. In my perspective benifits outweigh its drawbacks.
