

In the first world, the midpoint life expectation is expanding. This essay will reflect upon the tribulations that can affect not only masses but community as well; moreover the strategy must be taken to decrease the consequences of the older people masses suffering

To begin with, difficulties that are expected by the hope of better lifestyle by the persons, are expansion of population, which tend to pave the way for the employment crisis because nowadays even the people of lower strata of the society, dream of having the better life; moreover the masses from all the sphere of community look for job. For instance - Education has made the people to desire for a luxurious life.

However, it does not mean that this troubled water can be eradicated. If things will be done systematically like generating of jobs for everyone who are qualified by lot. In fact, the development in the
