

Q More and more people are finding it increasingly important to wear fashionable clothes. Is this attitude to wearing clothes a positive development or negative?

Ans In the modern era, more than half of the population are giving top priority to wear fashionable clothes. This essay will discuss the various statement about this trend and provide a logical conclusion.

To begin with, in today's fast life people are keeping them updated with the trend. The citizens of the country like to wear fashionable clothes because, it makes them look smart, to have a unique style clothing that is different from everyone. Thus, by wearing newly designed clothes they try to copy their favourite actor style and even try to look like him. Secondly, when people buy updated clothes, they try to follow the latest fashion style that is being followed in other countries too. Therefore, by following the trend, people keep them updated with time and style, and try to look smart in their home country. These are the main reasons for which people are giving importance to wear fashionable clothes.

On the other hand, this trend act as a positive development as it creates standard style of clothing all over the world, and it gets easier for citizens to buy their choice of clothing in other countries also. Thus, reducing different fashion culture and promoting equality in clothing wearing styles. Furthermore, it creates job for people working in clothing industry as they know the skill to manufacture a particular fashion style clothing, and by this they can even work in foreign countries and earn huge money. Hence, increasing the employment rate and opportunities in clothing sector. For instance, a survey was conducted in 2017 and it showed that jobs in

fashion industry got increased from ten percent to fifty percent when citizens started following fashionable clothes. These are two factors for positive development of wearing fashionable clothes.

In conclusion, the government should promote clothing manufacturing industry by giving different subsidies which will create more jobs, and citizens will be able to wear fashionable clothes at a much lower price.
