

It is argued by some that art is a very important subject while other feel it is not time worthy. ~~I agree with the former~~ This essay will be discussing both views but personally I strongly agree with the former.

On one hand, <sup>some</sup> people ~~that~~ feel that art is very important subject in the curriculum. ~~It is not a burden~~ Art is not a burden in fact it helps in concentrating more in the academics. Sometimes studying only the core subjects becomes monotonous and children tend to get bored. This is where Art and all other extra curriculum subjects are important. It is not a waste of time rather if someone is really creative he can build a career on it.

On the other hand many believe Art is ~~a~~ not time worthy and is just another distraction ~~of the~~ ~~many~~ in the Academics. People tend

to get carried away in the extra curricular subjects and hence lose their focus on the Academics which in turn affects their grades. It is believed by this part of the group that there is very less exposure in Art compared to the variety we get in different vital subjects in the academics. Pursuing Art as a career leaves very ~~in~~ limited opportunities; whereas focusing on academic subject gives us a variety of career to choose from.

In conclusion, though many people feel that art is a wastage of time & personally feel that it is very essential subject <sup>because</sup> ~~as~~ it helps <sup>to</sup> grow your creativity as well as it helps ~~you~~ ~~to~~ ~~reflect~~ to concentrate more in academics.
