

The internet has transformed the way information is shared and consumed, but it has also created problems that did not exist before.

What are the most serious problems associated with the internet? What solutions can you suggest?

Nowadays, The information is shared and consumed by the internet ~~is~~ ^{has} creating a distinct problems that did not exist before. However, It can be controlled by making strict laws among the community by the central government.

The visible problems by transforming the data through internet are Hacking of Data, Cyber crime and bullying rate has been increasing. Firstly, In the current decade hacking of data from internet is a very common issue in the society. For instance, In all the Big companies and Educational Institutions are uploading copious amount of data into the internet, So, it is quite easy for the hackers to hack their data and they demand money from them. Secondly Hacking leads to the tremendous growth in both cyber crime and cyber bullying. In addition to that cyber bullying construct a pressurize situation on

victim and sometimes it pave a path to many suicide attempts. on the other hand, spammers also cause cyber crime and bullying by sending a message to large number of recipients this spamming is also occur by giving one's personal details to the internet. These are some of the visible problems faced by the society on sharing their information into the internet.

Personally, I think that the above all the problems has been solved by the central government on taking a serious decisions about this issues and it also an individuals responsibilities to not sharing more details on the internet. Finally, some protection act must be implemented by the lawmakers. They are responsible for proposing and passing new laws to decline the rate of cyber crime.

Taking Everything into consideration, Making
Strenuous decisions to avoid this emerging
problems one must be aware of
hacking, cybercrime, cyberbullying and
Spammers on the other hand central
government also have to pass a
strict law against these problem.
