

Some people think that art is an essential subject for children at school while others think it a waste of time.

It is argued ~~to~~ by some people that ~~not~~ having art subject at school is important for children ~~their~~ mental development. ~~some~~ ~~others~~ However, others, believe that it ~~is~~ is not necessary subject at school. In my essay, I will discuss both sides of the argument and present my opinion.

From my point of view, arts provide challenges for learners at all levels by connecting students with their own culture as well as in improving their mental ability of thinking and creating ideas. It is also possible to say that art acts as a medium for the shy pupil to express their emotions directly. One good examples, is my daughter who is very shy and don't want to speak in public but she is very good in arts and express her loves and emotion for her love ones by creating a card, painting, sculpture, etc. Moreover, art allow her to enter a state of relaxation too.

On the other hand, it is thought by a handful of people that art education at school is a waste of time. There are more important subjects that would benefit children for their future life. Science, technology and mathematics, for example, are the great significant subjects, which allow student to find good jobs after graduation. However, many talented artist ~~enough~~ ~~praise~~ the public for their appropriate praise from their work done.

In conclusion, although many individuals ~~believe~~ claim that art is not ~~important~~ important in school, it seems to me that having access to art in school enhances problem-solving skills, which helps children for better learning outcomes.
