

~~big~~ Some people believe that studying at University or college is the best route to a successful career, while others believe that it is better to get a job after school. Discuss both views and give your opinion.

It is considered by some people that higher education at a college or the University will always be beneficial for a bright career whereas some believe that going for the job right after the school ~~is~~ ~~more~~ makes more sense. In this essay, both aspects will be discussed along with my opinion.

To get a dream job with a handsome salary package, ~~one~~ it's necessary to go to college for graduation as due to increasing competition the eligibility criteria to get a job is also increasing. Students need to work hard on their theoretical subjects as well as they need the practical training. Moreover, college and university plays a vital role in building an individual's personality as ~~the~~ he come across different experiences while studying at which

could help him to enhance his life skills. One can explore different subjects according to his preferences and interest ~~and~~ which could help him in choosing better career option. For instance, the students passing out from renowned institutes ~~and~~ like IIM & IIT were getting highly paid jobs without any further hassle.

Whereas, it is a belief of some people that a student should be placed into a job right after his school as with this he would no longer be a burden on his family. The person can help his ~~his~~ family financially. This can help a person in becoming more responsible and manageable. We come across many businessmen, who never go to college for higher studies as they believed that to follow their passion it is more important to have experience rather than different educational skills. Radhakrishan Damani, one of the biggest Indian investors ~~is~~ is one of the examples as he was a dropped out of college.

In my opinion, not every student has the idea about their passion

to be followed right after the school so education at college or University is a must ~~to~~ to explore new skills and interests which could lead to a better future. To conclude, every individual

~~In conclusion,~~ has their own point of view about ~~getting~~ studying at a college or a University according to their feasibility.
