

Task-2

* Some people believe that unpaid community service should be compulsory part of high school programs (for example working for a charity, improving the neighbourhood or teaching sports to younger student children).

To what extent do you agree or disagree?

=> Many debate on Program of development and voluntary works should not be a part of education system. Some citizens argue that it is not necessary to have. However, some others believe that doing voluntary activities like help to other, cleaning that must be included in school system. Personally in my opinion, I believe that schools must adopt volunteerism in their academic system based on improving self development and Responsibility point of view.

Firstly, Increasing value of Knowledge is consider as a part of school. Since school

is a place for the educational process, it must be ~~to~~ based for improve the student's knowledge, but also with this its effect in person behaviour of students. We can deal with this issue by managing with events and give chance to volunteer to organize these events and give some knowledge on social ~~as a~~ to pupils as a part of lectures. It's help to boost student's in understanding about ~~this~~ their social needs and how to deal with social problem. Unpaid school internship, for instance, It has been imposed by several schools and as a consequence, the people of these schools are active in helping to poor ~~and~~, ~~also~~ ~~are~~ active in cleaning and other social activity without any instruction.

Secondly, the idea of ~~volunteerism~~ volunteerism is effect on students behaviour, ~~at~~ attitude and give to thinking ability ~~be~~ by ~~themselves~~ themselves. Adult volunteers in the social activity, For example

They work for some charity programs and help to needy people, they deal with different people with different attitude ~~as~~ as well behave. Because they are accustomed to doing volunteering since it was the part of after school programs they attended.

Finally, as an educational agent, the school has to optimise student life skills, ~~and~~ academic, attitude and behaviour, by involving such social activities or program in the school curriculum.
