

Education is an important tool which is very useful in everybody's life. Over last few decades the world has seen that more and more students are studying abroad with the encouragement of their family. This essay will highlight the both advantages and drawbacks of this trend.

There are two main disadvantages of sending children to abroad. Firstly, it's very too costly since universities ask for high amount of tuition fees from international students. Hence parents prepare the amount by taking loan, renting their house as a result it became financial burden. Secondly, many students are facing racial discrimination for instance it have negative effect on their health and physio psychology. Consequently it leads to drugs consumption and divert from their goals.

However, some of the advantages with studying abroad is job opportunities. With a bachelor degree in some developed countries such as USA, UK, Australia, people have lot of chances to get well paid jobs which also give them global exposure and knowledge of new culture. Also, high-paid job encourages them to work harder which also promotes efficiency.

of their work and build confidence.

To sum up, although there are some drawbacks such as expensive price, perhaps, it outweighed by the material advantages like job opportunity student will have better future if they study overseas.
