

There has been a major rise in tourism in the past few decades, and English has played a massive role in its progress, however, this scenario has generated the challenge of homogenization. This essay will discuss the pros and the cons of English being a renowned language. So w

First and foremost, the extensive use of English has led to a significant diminish in ethnic gap amongst people belonging to distinct cultures, furthermore boosting cohesiveness. For instance Netherlands is a nation with majority of Dutch people residing, however Indians living there barely find it hard to communicate with the Dutch since more or less everyone can converse in English, hence declining the language barrier. In addition creating plethora of employment opportunities for citizens of India as well as booming the Indian economy.

Meanwhile, the multiplying popularity of English has led to the adversity of expanding homogenization, where the distinctive features of a culture starts fading away due to the dominance of a foreign trend or a language. A relevant example of this would be the persisting significance and priority given to the English language in India, while disregarding Hindi, moreover deteriorating heterogenization in the country. Provided that the younger generation is hardly familiar with their native language as well as adopting the western lifestyle, while often ridiculing their own.

To summarize, although numerous advantages are being witnessed due to immense number of individuals communicating in English, yet there are various problems associated with it like losing one's culture due to homogenization.
