

In the modern world, most of the high professionals, particularly medical and teaching professionals willing to migrate abroad, which ~~is~~ were developed countries. However, their home countries faced many kinds of the problems. This essay will discuss those issues and the solution of those problems. Firstly, in their home countries, lot of competitions in high professions, because each year ^{thousand} students were completed their professional courses, but they are not getting proper job in their career. Specially doctors and teachers.

To begin with,

To begin with, Doctors and teachers have not got extra facility in their home countries. Although they are working long hours but getting low wages. moreover, infrastructure of teaching and medical sectors need to improve for the reason of that, every generation of the students ~~is~~ are studying same subjects and syllabus. for instance, most of the Indian doctors recommended to their patients for excellent treatment to the United State of America, also, high professional people decided

to their children to study ^{at} abroad.

On the other hand, Although their home countries can provide better facilities for the high professionals also can arrange less working hours and high wages, moreover can require extra manpower to share their work stress. So, the nation import latest technologies equipment from developed countries. Not only that but also can change syllabus of medical and teaching subjects. For instance, the nation can arrange abroad education system in their local education system.

To Conclusion, Above essay discussed ~~pro~~ regarding pros and cons of problems and solutions for doctors and teaching professionals to move to abroad and their home countries faced issues and solution. However they have to think their home countries development as well.
