Change is constant therefore we get to see, so many change alterations in our lives as well in our person level or professional level, for instance it is noticeable in the workplace the changes in the sitting arrangement, for this kind of set up opening area is used by the employees rather than so private room. This essay will portray the ~~results~~ and demerits not only but also the conclusion as well.

Firstly, de-foliated area enables us to help each other because as a subordinate when ~~we~~ ^{someone} get stuck at any point of working system, the senior sitting next to ~~them~~ ^{to} guide ~~to~~ them at that point, for instance - we get to learn from our high-ranking employee. Secondly, this kind of open style in the workroom is cost effective since we go there for working purpose, luxury is of no use, better environment is perfect to ~~to~~ do job whatsoever, the design be.

(2)

But this kind of arrangement in the place where we go for work can act as a hindrance because when any ~~emp~~ person is newly appointed, they have the fear of being bullied that can harm their career. There is an example from my life that my cousin was working in the management, he was teased that finally he had to quit the job. Furthermore, this kind of expansion working pattern can play up with our concentration, which further can result into delayed promotion.

To conclude, although ^{work} ~~work~~ style of working home ^{is not} ~~is not~~ which affects people negatively however, on the contrary it has gains as well. I believe that positives outweigh its drawback.
